

The BN/KL Outflow

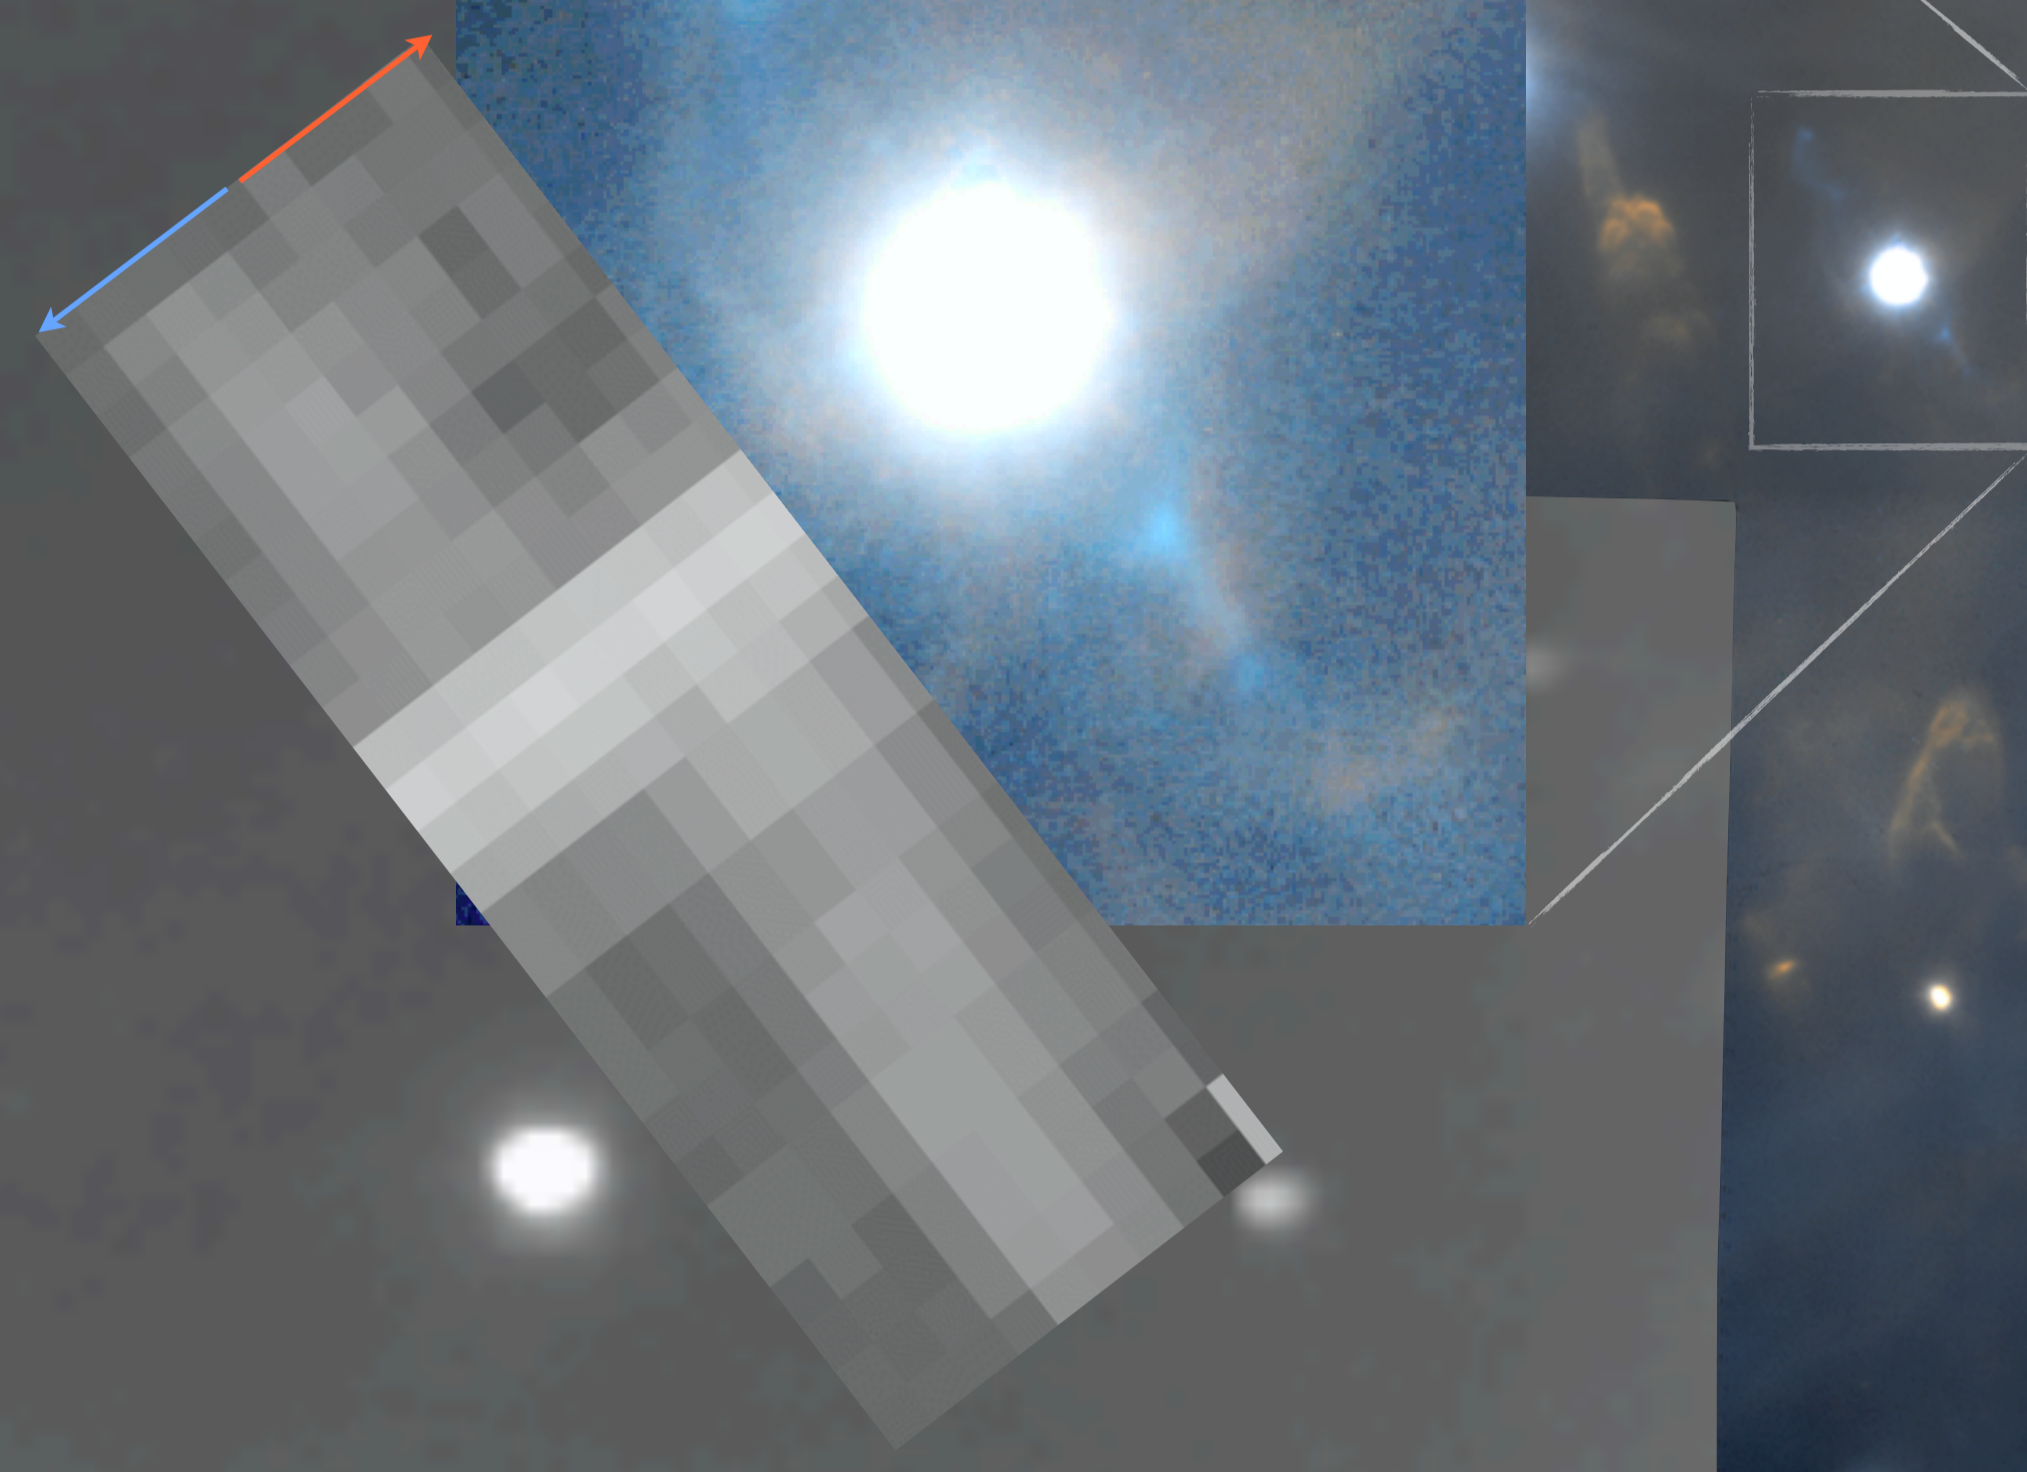

Adam Ginsburg & John Bally

with assistance from the GEMS team: Peter Michaud, Benoit Neichel, and Francois Rigaut

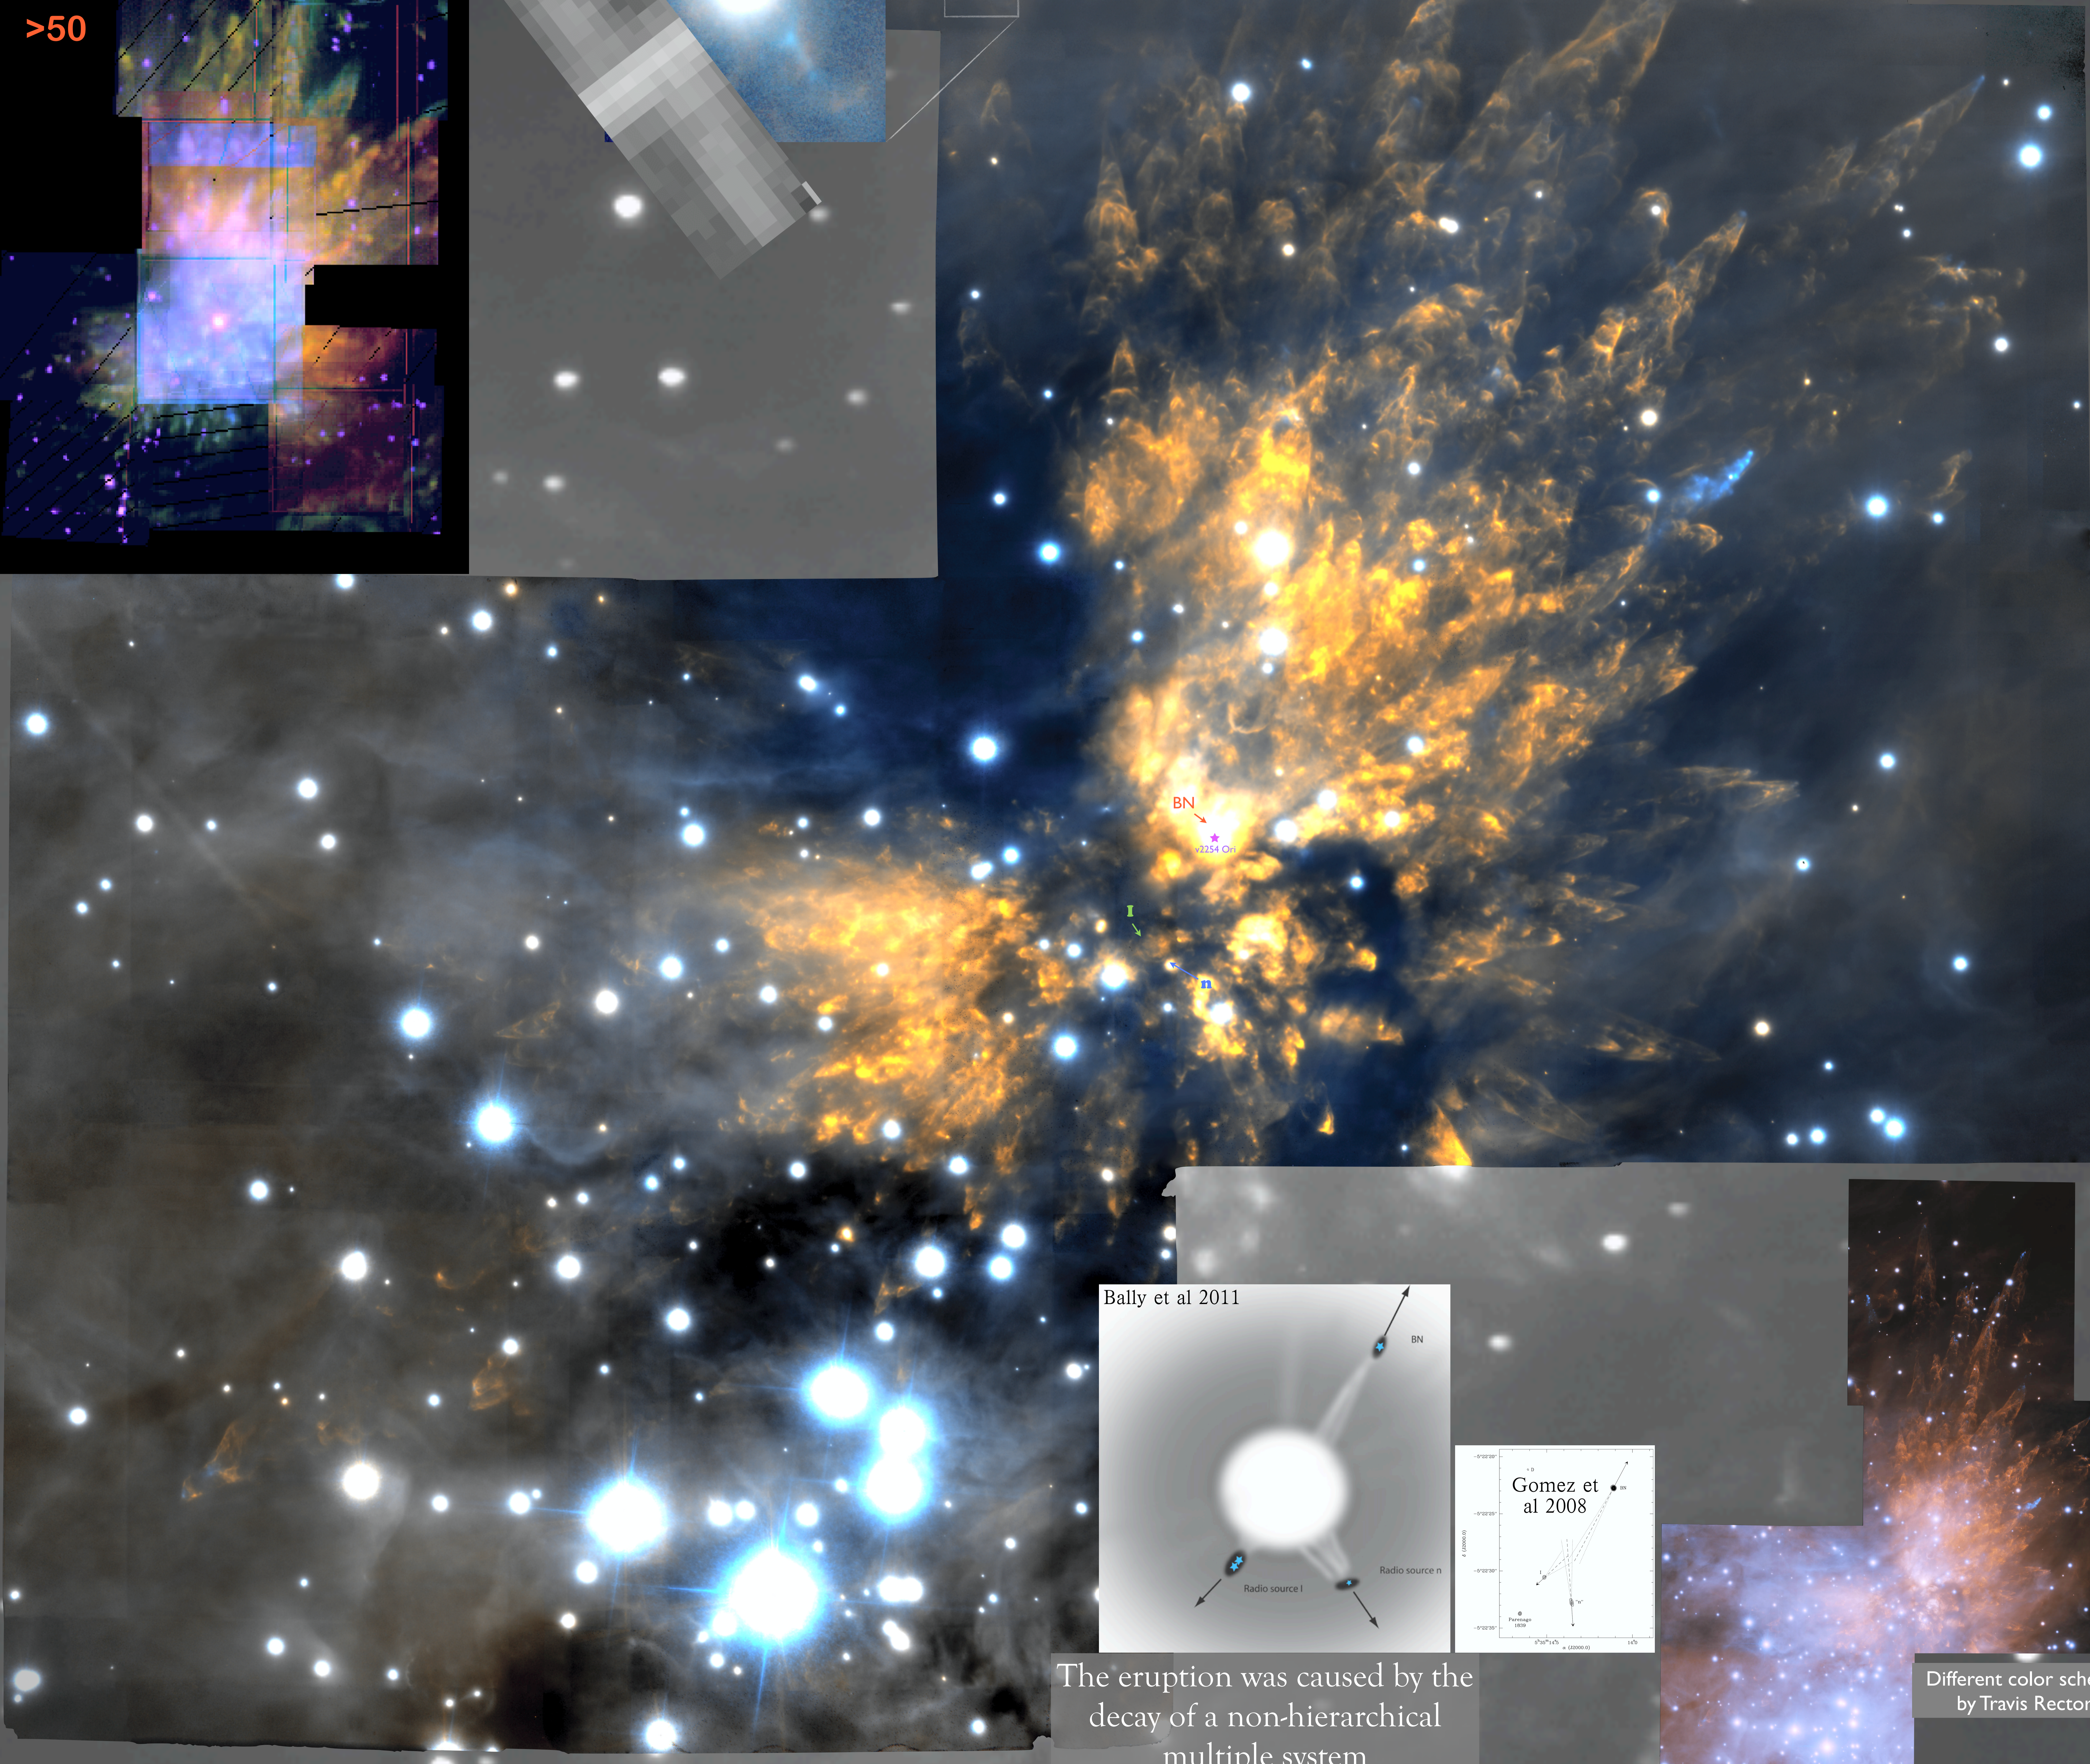

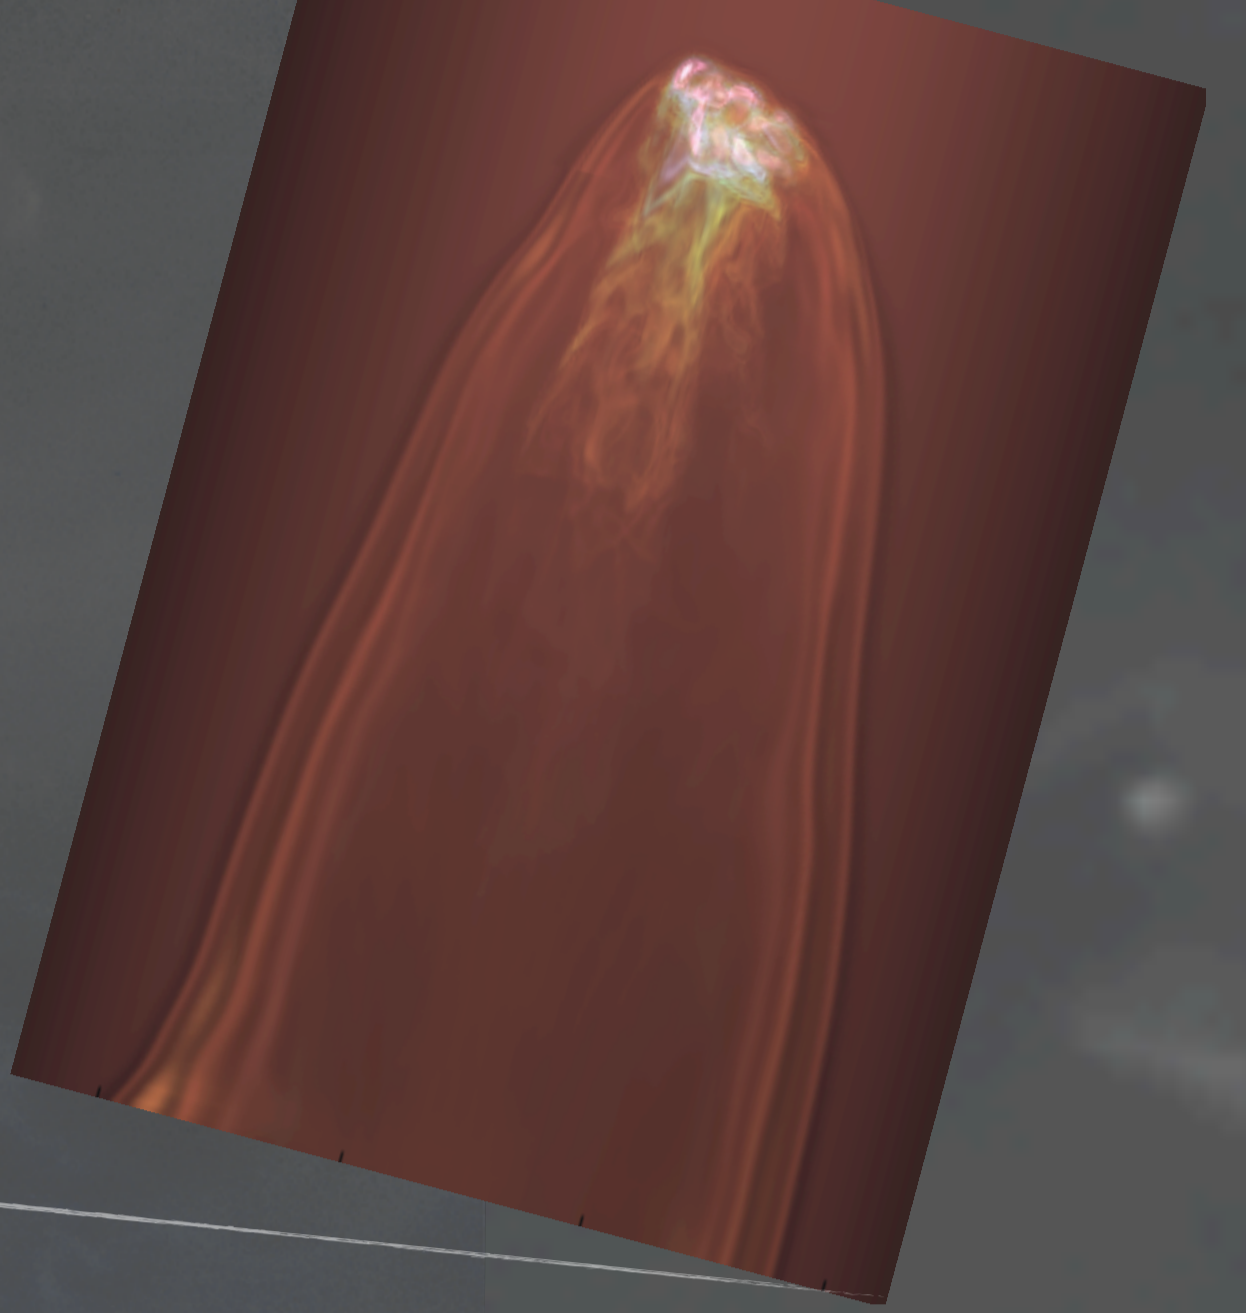

TripleSpec slit-scanned data cube covering the whole JHK band

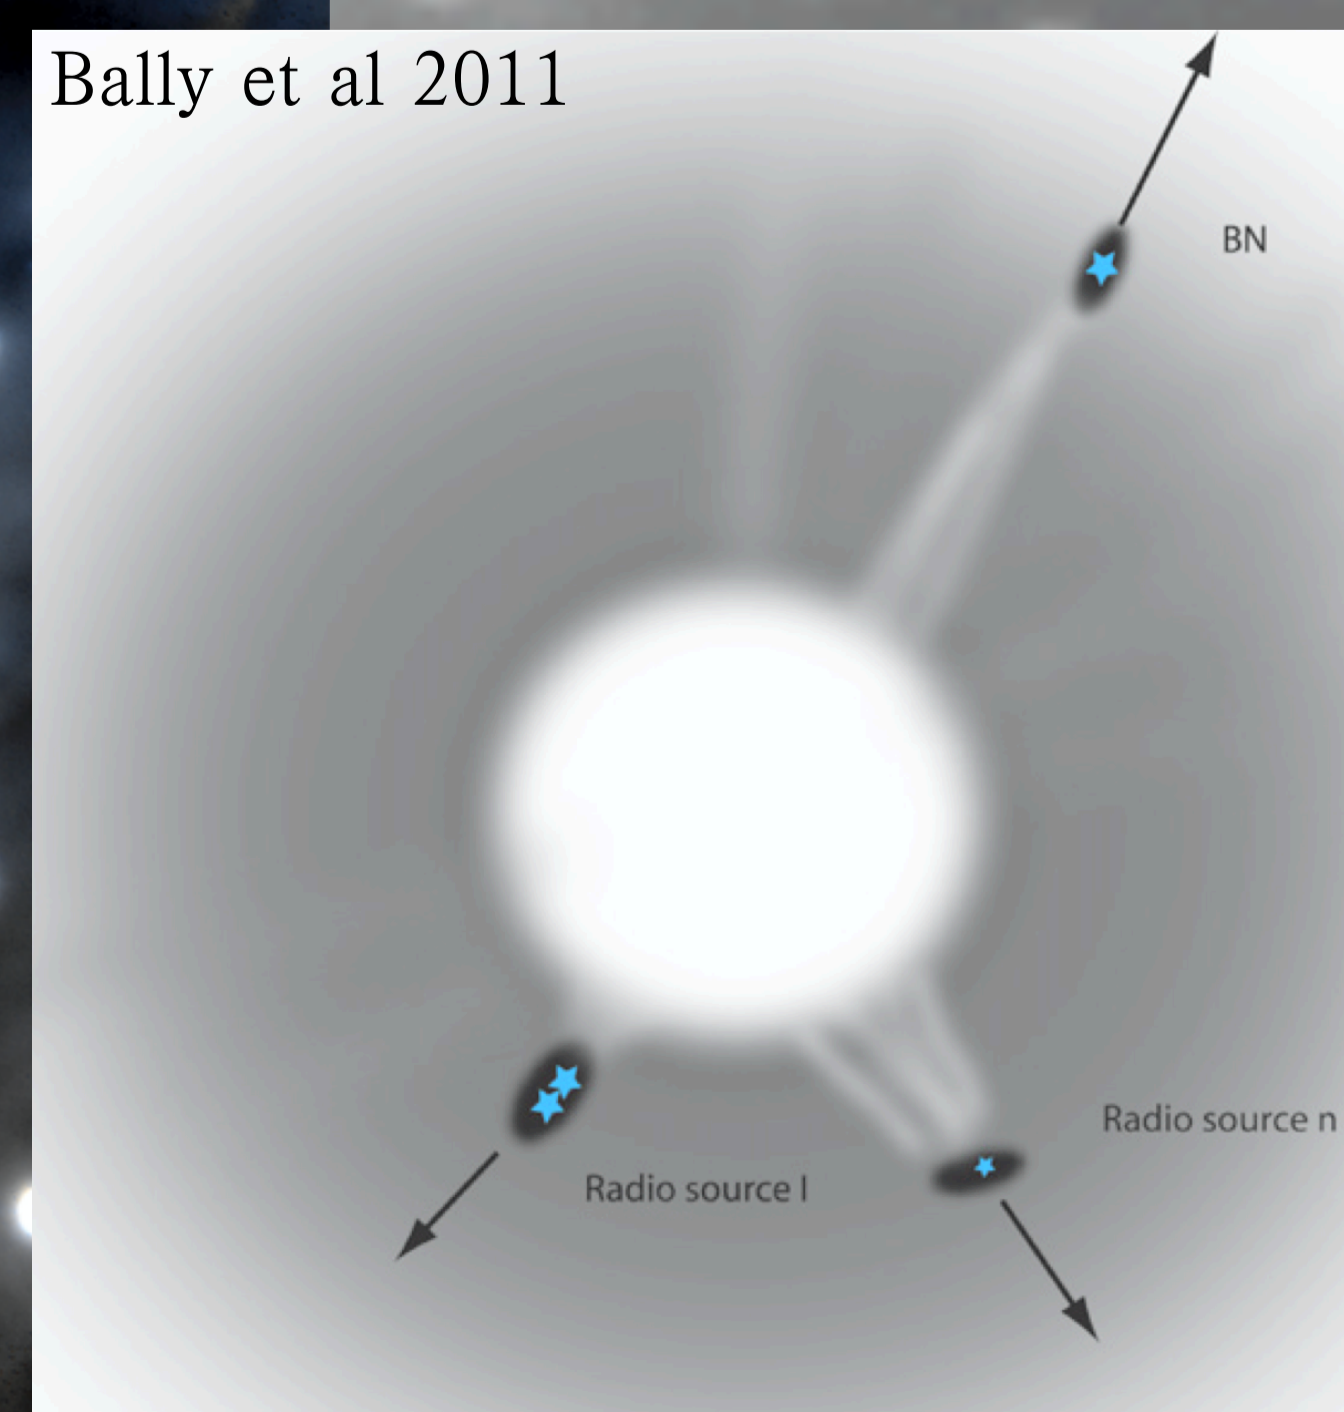

A bipolar [Fe II] Jet
V 2270 Ori

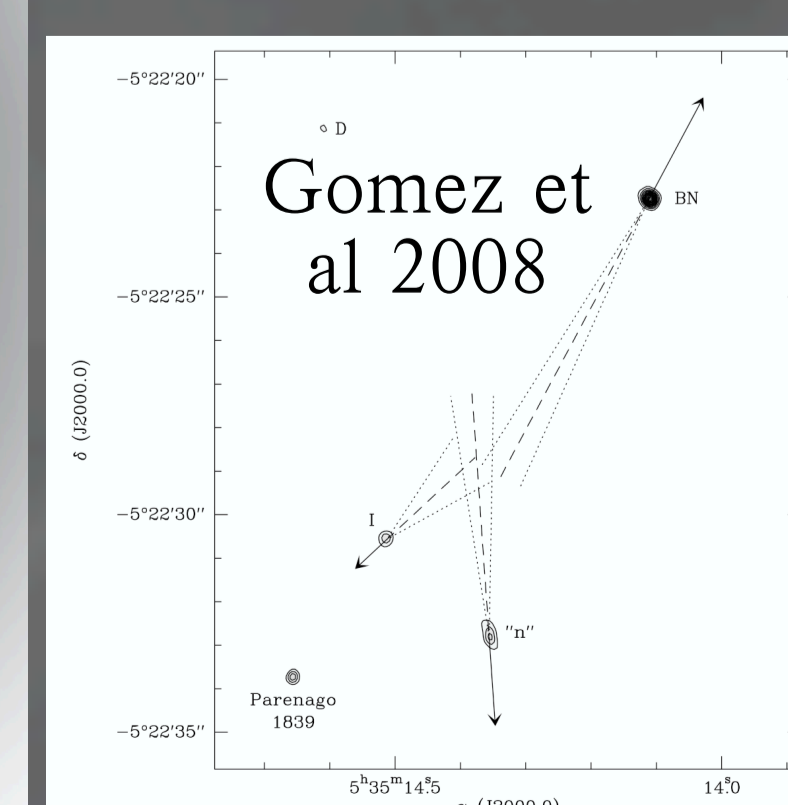

A snapshot from a hydrodynamic simulation of a high-density cloud with overdensity 1000 moving at 10,000 km/s. These conditions are not realistic, but the resemblance is impressive.
(simulation & rendering by Devin Silvia)

Bally et al 2011

Gomez et al 2008

The eruption was caused by the decay of a non-hierarchical multiple system

Different color scheme by Travis Rector
