

A *WISE* survey of circumstellar disks in Taurus

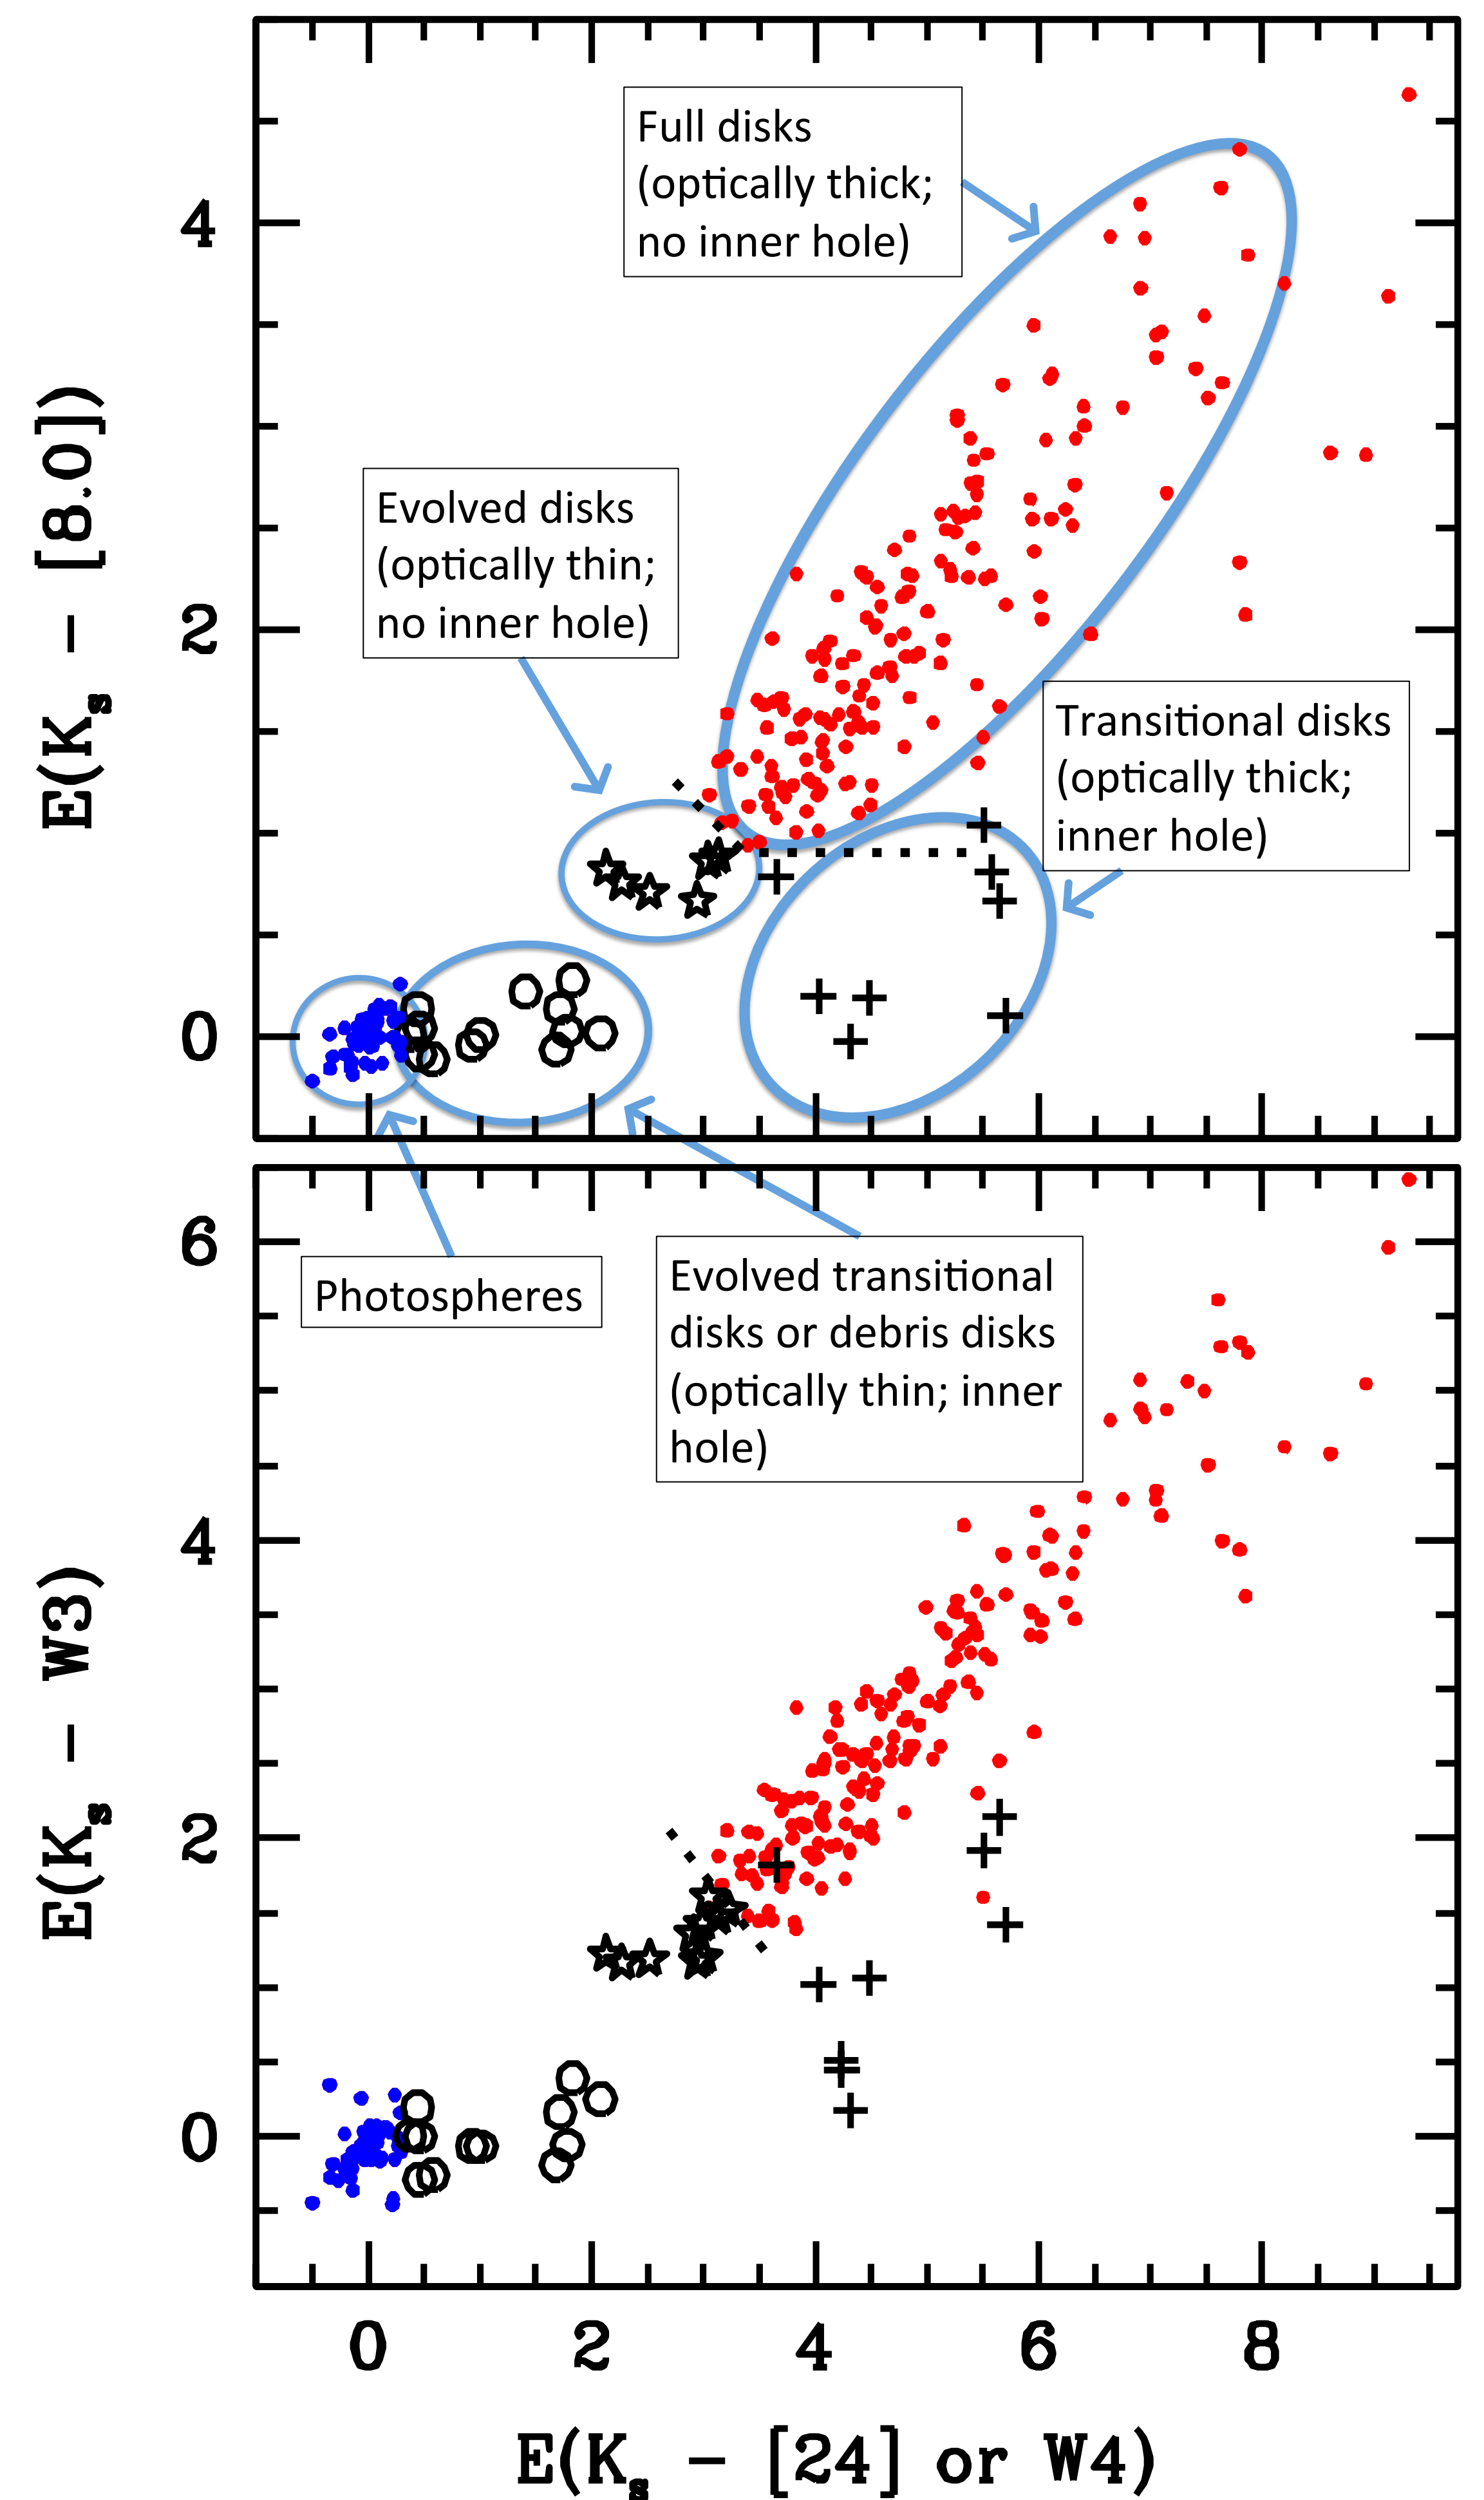

T. L. Esplin¹, K. L. Luhman¹ & E. E. Mamajek²

¹The Pennsylvania State University, University Park, PA 16802, USA, taran.esplin@psu.edu; ²The University of Rochester, Rochester, NY 14627, USA

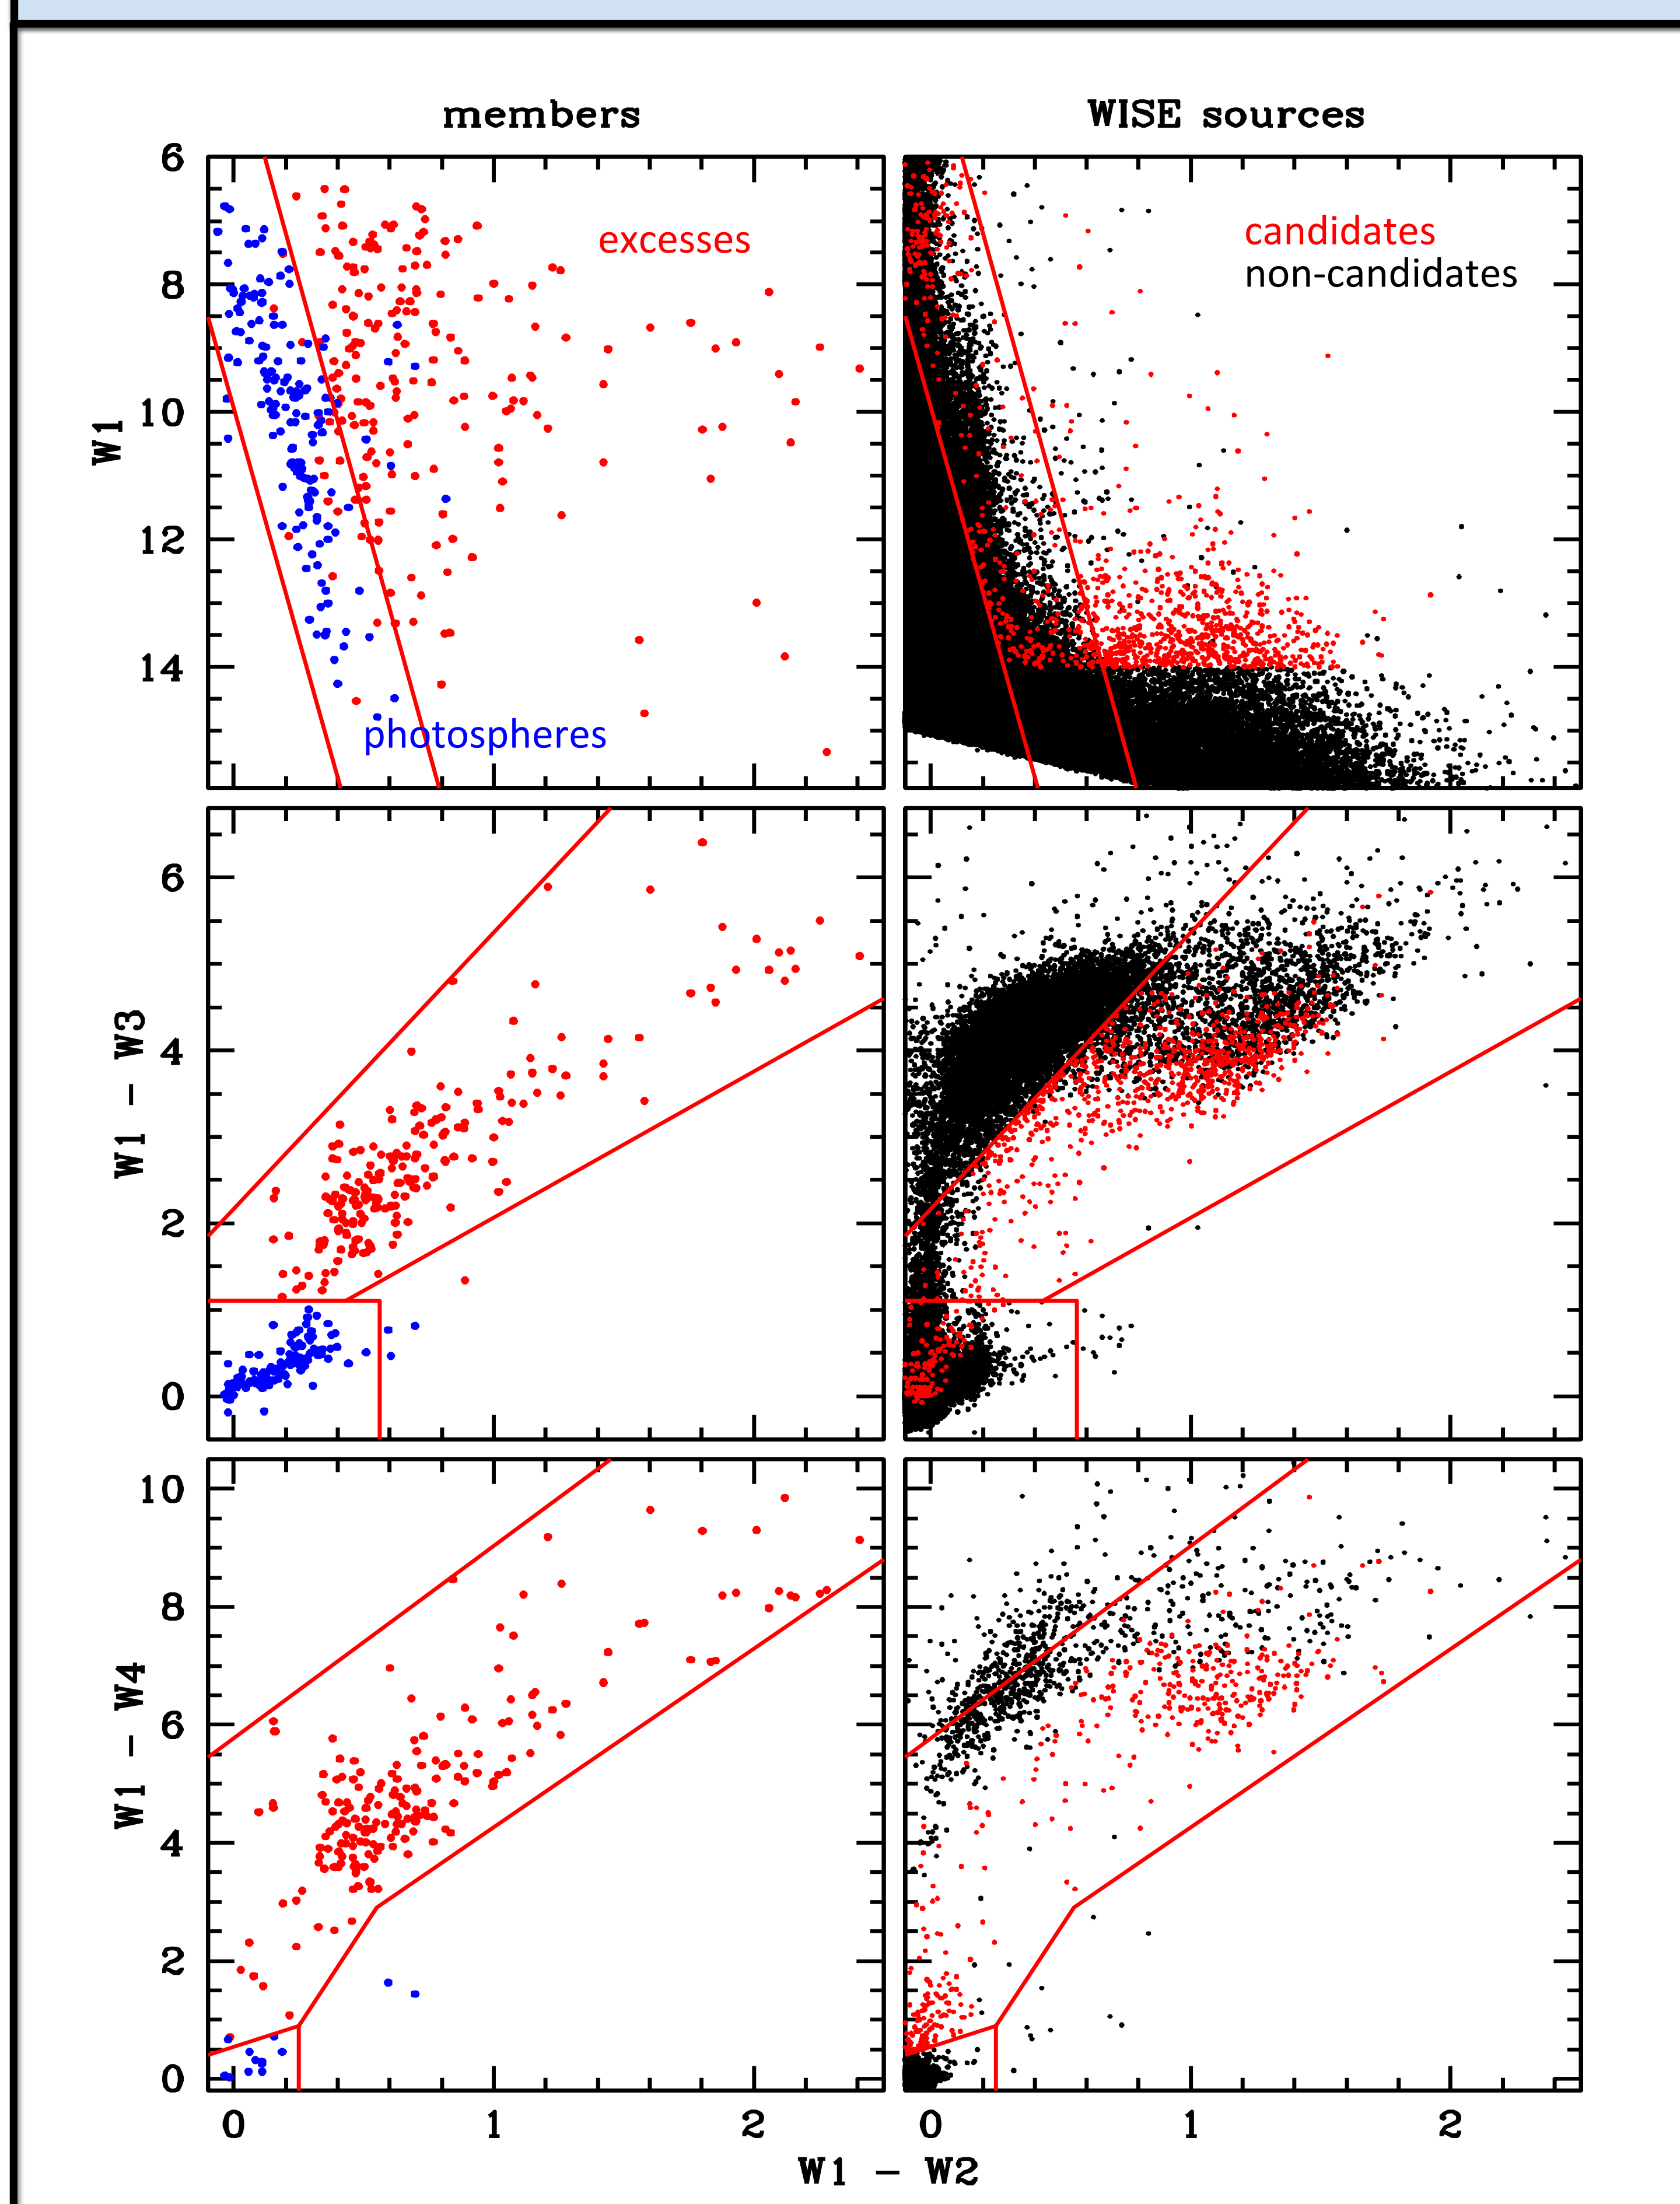

Target: Taurus star-forming region

Classification of disks for known members

Search for new members that have disks

Disk members nearly complete $\leq M8$ ($\geq 0.03 M_{\odot}$)
